

Broadpoint provides highly reliable satellite and cellular communications. Some of the largest and most progressive companies in the world depend on Broadpoint's technology and expertise for far-reaching and critical communications capabilities. All services are backed by a world-class technical support and engineering team. Since 1976, Broadpoint has earned a reputation for delivering outstanding technology supported by highly trained professional service technicians. No communications company is working harder to help its customers stay connected and productive onshore and offshore.

## Broadpoint Add-On Satellite.

The power of piggybacking.

Sharing satellite resources while maintaining superior bandwidth pools can make sense and save money. Add-on-Satellite (ASAT) packages for subcontractors and other third-party clients as well as current users to access VSAT equipment already onboard platforms and vessels. This added bandwidth could also be used for special projects.

### Services offered:

- Voice
- Dedicated data
- Dial-up data
- Internet access

### Advantages:

- Private secure network
- Minimal installation
- No commissioning cost
- Efficiencies in bandwidth utilization
- Separate bandwidth pools

**Broadpoint Add-On Satellite.**

ASATs allow third-party clients and current users to utilize Broadpoint's existing VSAT equipment on platforms or vessels. The second user or multiple users have voice, data and Internet connectivity via the existing onboard VSAT system while enjoying secure and separate bandwidth and network services. ASATs provide complete telecommunications services to a third party or project without requiring them to invest in a VSAT system of their own.

ASAT packages	ASAT-64	ASAT-128
Number of Lines	1 voice & 1 fax	2 voice & 1 fax
Circuit Size	64 kbps	128 kbps
